

**IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER
Monitoring Requirements Not Met for Aztec Domestic Water System**

Este informe contiene información importante acerca de su agua potable. Haga que alguien lo traduzca para usted, o hable con alguien que lo entienda.

On 9/16/2016, we became aware that our system recently failed to collect monitoring samples required by the Stage 2 Disinfectants/Disinfection Byproducts Rule. Although this incident was not an emergency, as our customers, you have a right to know what happened, and what we are doing to correct the situation.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. Table 1 list the contaminants and the compliance periods for which we did not monitor correctly. Because these samples were not collected in the proper month of the quarter, we cannot be sure of the quality of our drinking water during the compliance periods listed below.

Contaminants	Required Sample Point ID & Location	Reported Sample Point ID & Location	Sampling Frequency	Compliance Period(s)
Total Trihalomethanes and Haloacetic Acids	TTHM-1 992 Hampton Canyon Road HAA5-1 208 Willow Lane	SP09824001 - Distribution ** Samples were due in November and collected in December.	Quarterly	4 th Quarter 2013
Total Trihalomethanes and Haloacetic Acids	TTHM-1 992 Hampton Canyon Road HAA5-1 208 Willow Lane	TTHM-1 992 Hampton Canyon Road HAA5-1 208 Willow Lane ** Samples were due in May and collected in June.	Quarterly	2 nd Quarter 2014
Total Trihalomethanes and Haloacetic Acids	TTHM-1 992 Hampton Canyon Road HAA5-1 208 Willow Lane	TTHM-1 992 Hampton Canyon Road HAA5-1 208 Willow Lane ** Samples were due in August and collected in September.	Quarterly	3 rd Quarter 2014

What should you do?

There is nothing you need to do. You do not need to boil your water or take other corrective actions. You may continue to drink the water. If a situation arises where the water is no longer safe to drink, you will be notified within 24 hours.

What happened and what is being done?

Our samples were taken during the proper quarter but not in the correct month of the quarter. The results we received for the samples were well below the maximum contaminant level. We have changed our sampling plan to make sure we are sampling in the correct month as required by NMED. There was never a problem with the safety or quality of the drinking water. We failed to sample in the correct month of each quarter.
