WATER TURN - OFF

The Aztec Public Works Department will be turning water off on May 14, 2016 between 10 am and 4 pm in the area of Western Drive, Western Circle, Newman Avenue, Mulberry Street, Gossett Drive, and possible South Swire Avenue. We are making every effort to identify all affected customers. Please understand the system is somewhat illusive in this area and some customers outside the area identified above may also be affected.

This exercise is necessary because we are replacing critical water line valves that are broken. These valves must be repaired for the Public Works Department to properly maintain the water system. And...the construction of the Sewer Outfall project will be starting soon and this work must precede that project.

The City asks for your indulgence during this water valve replacement and encourages those affected customers to take remedial measures in advance. These precautionary plans could be stocking up on drinking water and storage of water in containers to use to flush your toilet. Please contact the Public Works Department at 334-7660 if you have questions or require assistance during this process.
